Quite Successful Format

- The October 2016 Common Crawl reports over 2.1 million (out of 34 million) domains include JSON-LD [1] (highest is Microdata at 2.5 million).
- JSON-LD is one of the formats supported by <u>schema.org</u>, in addition to Microdata and RDFa [2].
- JSON-LD is a required format in the Linked Data platform [3].
- JSON-LD is becoming popular for many other REST APIs.
